SUMMARY OF NEW JERSEY DEPARTMENT OF AGRICULTURE LAWS GOVERNING THE SALE AND SHIPMENT OF NURSERY STOCK IN NEW JERSEY

I. Definitions

Commercial shipment: A shipment for gain or profit.

Dealer: A person who purchases nursery stock from other certified nurserymen and offers such stock for sale at a retail outlet or through landscaping services.

Federal Phytosanitary Inspection: The examination of plant materials to determine freedom from plant pests and diseases for those persons desiring to ship plants or plant products to another country and the issuance of a USDA APHIS PPQ inspection certificate.

Postentry Quarantine Inspection: The examination of imported plant materials over a period of two growing seasons to ensure freedom from exotic plant pests and diseases.

Persons wishing to import and grow federally regulated plants must apply to the USDA APHIS PPQ for screening and a postentry permit.

Low value commercial shipment: A shipment accompanied by an invoice which states that the items being shipped are worth less than \$1250.

Non-commercial shipment: A shipment not for gain or profit.

Nursery: All lands, premises and buildings upon, or in which plants, trees, shrubs or vines of any kind, whether for fruit, shade or ornament, are grown for sale within the State or for shipment to other states or countries.

Nursery stock: All plants, shrubs, trees and vines grown for sale, as well as buds, grafts, stocks, scions and other parts of plants, shrubs, trees and vines that may be sold for propagation; but shall not include herbaceous annuals or plants, flowers, vines or cuttings grown under glass and commonly known as florists stock.

Nurseryman: Any person, firm, co-partnership or corporation growing plants, trees, shrubs or vines for sale or dealing in such stock, whether he/she or they be owners, lessees or tenants of or on the premises upon which the stock is grown or offered for sale.

Reinspection: An inspection of a location in a nursery, previously inspected by the Department during the current growing season, found to be infested/infected with insect pests or plant diseases, for the purpose of determining whether pest problems found earlier have been controlled by the nurseryman.

II. Summary of Regulations

In Accordance with Chapter 7, Title 4 of the Revised Statutes of the State of New Jersey, the Department of Agriculture shall examine and inspect at least once in each year, with or without notice to the nurseryman, all nurseries or establishments of all dealers in nursery stock, to ascertain whether the stock grown on or sold from is free from injurious insects and plant diseases. After any nursery has been inspected and found to be free of dangerously injurious insects and plant diseases, the Department shall issue a certificate to that effect.

If the inspection shows the presence of dangerously injurious insects and plant diseases, the Department shall require the nurseryman to control the infestations or diseases, or to destroy the infested/infected stock, and to treat that exposed to infestation/infection in the manner necessary to render the insects or plant diseases harmless and the stock safe.

No nurseryman shall sell or offer for sale any nursery stock within New Jersey or deliver within the State until it has been inspected by the Department and a certificate issued.

Every nurseryman growing stock within the State, and every dealer in nursery stock, shall attach to every package, box, or container of nursery stock sent out or delivered by him, a written or printed copy of the certificate issued to him by the Department.

All nursery stock originating outside of New Jersey and shipped into New Jersey must be accompanied by a certificate, or by a written or printed copy of the certificate, attached to each package, box or container, stating that the stock to which the certificate is attached has been inspected and certified to be free from dangerously injurious insects and plant diseases by an authorized official of the state where the stock was grown.

Each dealer of nursery stock in the State is required to apply to the New Jersey Department of Agriculture for a dealer's certificate. The dealer is required to inform the Department of the sources of his nursery stock, and if the Department is satisfied that the nursery stock obtained from these sources is free of dangerously injurious insects and plant diseases, a dealer's certificate is issued. It is unlawful for any dealer in nursery stock within the state to sell or offer for sale or to deliver any nursery stock unless a copy of the current dealer's certificate is attached to the stock.

It is the duty of all growers of plants or dealers in plants of any kind, upon their own or upon leased lands or premises, to keep all plants grown, cultivated or dealt in by them, free from all dangerously injurious insects and plant diseases.

III. Certificate and Inspection Fees

Nursery Certification - Nursery certificates expire December 31. Inspections are conducted annually. The following fee schedule shall apply to all nursery inspections conducted by the New Jersey Department of Agriculture:

SUMMARIZATION OF NEW JERSEY NURSERY LAWS (CONTINUED)

<u>ACRES</u>	<u>FEE</u>
0 to 2.00	\$75.00
2.00 or more or part there of	\$75.00 plus \$4.00 for each acre

The nurseryman shall be entitled to one reinspection at no additional charge, if necessary, at each location within 14 days following the "control by" date listed on the nursery inspection report.

Fees for additional reinspections of a nursery location, due to failure on the part of the nurseryman to control such insect pests or plant diseases as prescribed on the nursery inspection report, shall be assessed for each location reinspected using the fee schedule in N.J.A.C. 2:18-1.2(a) (as listed above).

The Department reserves to right to waive reinspection charges if in the opinion of the Director of the Division of Plant Industry, the failure to successfully control pest problems was a result of pest biology, resistant pest strains, adverse weather conditions or other extenuating factors.

Dealer Certification - Plant dealer certificates expire December 31. Inspections are conducted annually. Fees for inspection of dealers shall be \$75.00. Dealers with more than one place of business in the State shall be charged an additional \$75.00 for each location.

Phytosanitary Certification - Inspections shall be made upon request. There shall be a \$50.00 fee for each federal or special phytosanitary inspection of a commercial shipment necessary for the issuance of a phytosanitary certificate. There shall be a \$20.00 fee for each federal or special phytosanitary inspection of a non-commercial or low value commercial shipment necessary for the issuance of a phytosanitary certificate. Fees for phytosanitary inspections carried out for other governmental agencies shall be waived.

Postentry Quarantine Inspection Fee - There shall be a \$50.00 fee for each inspection of a commercial (high value) shipment and a \$20.00 fee for a non-commercial (low value) shipment of imported federally regulated plant material for approved permittees.

Method of payment - All nursery and dealer fees shall be payable within 30 days of receipt of invoice. Failure to pay the fee shall result in the assessment of penalties pursuant to N.J.S.A. 4:7-26 and the revocation of nursery certification.

Late fee - A fee of \$5.00 will be assessed if payment is not received within 15 days of the due date printed on the original invoice.

IV. State Quarantines

SUMMARIZATION OF NEW JERSEY NURSERY LAWS (CONTINUED)

GOLDEN NEMATODE (Globodera rostochiensis)

States regulated - Infested portions of New York and Canada

Commodities regulated - Soil, sod and sand

Restrictions - No soil, including sod, and sand, shall be moved from any area known to be infested with Golden Nematode, into the State of New Jersey, except when fumigated by an approved method and certified as such, or except to laboratories approved by the Deputy Administrator, Animal and Plant Health Inspection Service, United States Department of Agriculture for such purposes as set forth in the federal regulation regarding interstate movement of soil samples containing Golden Nematode for processing, testing or analysis, 7 CFR s. 301.85-3(b).

WHITE PINE BLISTER RUST (Cronartium ribicola Fisher)

States regulated - All

Commodities/articles regulated - Plants of all species of Ribes and Grossularia.

Restrictions - Ribes nigrum is prohibited statewide. The movement of all other species of Ribes sp. and Grossularia sp. is prohibited into the following townships: Montague, Sandyston, Walpack and Vernon in Sussex County; West Milford, Ringwood and Wanaque in Passaic County; Jefferson in Morris County. Selected cultivars of Ribes nigrum are allowed under special permit issued by the Department of Agriculture.

CERIFERUS (OR JAPANESE) WAX SCALE (Ceroplastes ceriferus F.)

States regulated - All

Commodities/articles regulated - Infested hosts of Ceriferus (or Japanese) Wax Scale

Restrictions - The importation of the Ceriferus (or Japanese) Wax Scale is prohibited.

MEDITERRANEAN FRUIT FLY (Ceratitus capitata)

SUMMARIZATION OF NEW JERSEY NURSERY LAWS (CONTINUED)

States regulated - All

Commodities/articles regulated - Infested hosts of the Mediterranean Fruit Fly

Restrictions - The harboring or importation of the Mediterranean Fruit Fly is prohibited.

AFRICANIZED HONEYBEE (Apis mellifera scutellata)

States regulated - All

Commodities/articles regulated - Africanized honeybees, fresh or frozen bee sperm, equipment, shipping and storage containers that have been used at an apiary, unprocessed comb, vehicles that have been used to carry Africanized honeybees

Restrictions - The keeping or importation of Africanized Honeybees in any stage of development, including honeybees with characteristics identifiable with the subspecies (Apis mellifera scutellata), regardless of the purity of the genetic strains of the bees, fresh or frozen bee sperm, equipment, shipping and storage containers that have been used at an apiary, unprocessed comb, vehicles that have been used to carry regulated articles, other than fresh or frozen bee sperm, is prohibited.

KHAPRA BEETLE (Trogoderma granarium Everts)

States regulated - All

Commodities/articles regulated - Any product or building infested with Khapra Beetle

Restrictions - The harboring or importation of the Khapra Beetle is prohibited. Any building, product or means of conveyance of any character whatsoever, which, if in the determination of the Department of Agriculture, presents a risk of the spread of the Khapra Beetle, shall be subject to the measures of control allowed by the Statutes of New Jersey.

V. Plant Certification Requirements

NURSERY STOCK SHIPPED INTO NEW JERSEY

States regulated - All

Commodities/articles regulated - All plants, shrubs, trees and vines grown for sale, as well as buds, grafts, stocks, scions and other parts of plants, shrubs, trees and vines that may be sold for

SUMMARIZATION OF NEW JERSEY NURSERY LAWS (CONTINUED)

propagation; but shall not include herbaceous annuals or plants, flowers, vines or cuttings grown under glass and commonly known as florists stock.

Restrictions - All nursery stock originating outside of New Jersey and shipped into New Jersey must be accompanied by a certificate, or by a written or printed copy of the certificate, attached to each package, box or container, stating that the stock to which the certificate is attached has been inspected and certified to be free from dangerously injurious insects and plant diseases by an authorized official of the state where the stock was grown. The requirement listed above may be satisfied if the nurseryman or plant dealer appears in a current listing of certified nurseries and nursery dealers provided by the resident state.

VEGETABLE PLANTS

States regulated - All

Commodities Regulated - Vegetable plants

Restrictions - Plants must be certified to have been grown under an official certification program or to have been inspected and found free of insects and disease no more than 5 days prior to removal from soil.

ROSE PLANTS - Virus diseases

States regulated - All

Commodities regulated - Plants of the genus Rosa sp.

Restrictions - Rose plants shipped into New Jersey must be accompanied by a certificate stating that the plants were inspected during the growing season and were found visibly free of plant viruses.

PLANT DEALERS CERTIFIED FOR CALENDAR YEAR 2016: 545

Shipping Nursery Stock:

The Plant nursery and landscape industry remains the leading sector of the agricultural industry in New Jersey.

Nurseries are required by New Jersey law to control injurious insects and plant diseases, and plant dealers must agree to purchase stock only from certified nursery sources.

Many nurseries, landscape firms and garden centers in New Jersey are exploring new marketing opportunities, including Internet-based marketing. If you plan to ship nursery stock to other states or countries, please contact the Division of Plant Industry prior to shipping for the latest regulatory information.

The shipping requirement for individual state may be found at National Board website. The laws and regulations for each of the United States and Dominions may be found at:

<http://nationalplantboard.org/laws-and-regulations/>

The contact information for each of the United States and Dominions may be found at:

Phytosanitary Inspections: PCIT

The Division of Plant Industry has changed the procedure by which commercial State and Federal Phytosanitary Inspection requests will be accepted and administered. Requests for inspections and payments must be made electronically through the United States Department of Agriculture-sponsored Phytosanitary Certificate Issuance & Tracking System (PCIT) website, which can be accessed at the following web address: <https://pcit.aphis.usda.gov/pcit>

Federal administration of this program requires that any broker or shipper sending plant material within or outside of the United States of America, register and create a fee account in the system at their website: <https://pcit.aphis.usda.gov/pcit/>

There is no change in fees - State inspection fees will remain at \$50.00 for each State and or Federal Phytosanitary Certificate of a commercial shipment exceeding a \$1,250.00 value, and \$20.00 for each phytosanitary certificate of a non-commercial or low value commercial shipment.

Federal regulations require an administrative fee also be paid to the United States Department of Agriculture for Federal Certificates. The fee for an electronic certificate is \$6. This fee will apply only to Federal Phytosanitary Certificates. No administrative fees are charged for State Phytosanitary Certificates.

This new procedure eliminates the need for separate payments to the USDA for the administrative fee, and to the NJDA for the inspection service. Sufficient funds to cover inspection and/or administrative fees must be deposited in your PCIT account prior to contacting our office for inspection services. Fees may be deposited in your PCIT account via check, money order, credit card or debit card.

To ensure timely processing of your phytosanitary requests, please notify our office at (609) 406-6939, upon the completion of an application for inspection through the PCIT system. A minimum of two (2) business days will be required prior to the anticipated shipping date of the plant material. Thank you for your consideration in this matter.

Sincerely,

Galen Ettinger
Entomologist 1, Supervisor
Nursery Inspection Program

ATTENTION PLANT NURSERIES AND DEALERS:
